ICT Portfolio Management System

ICT portfolio management enhances the: governance; lifecycle management; and financial investment of ICT resources across an entire organisation

To assist organisations with the management of their ICT resources, **Dynamic Solutions** have developed a business software solution called **ICT Portfolio Management System**.

Modules

- **Documentation:** knowledge base for documents such as policies, procedures and training manuals
- **Master List - Software:** software and related lifecycle, risk and support details
- **Master List - Hardware:** details of the distinct type of hardware used by an organisation, including: model; components; asset type; and lifecycle
- **Environments:** details of networks and systems, as well as sites and locations
- **Sites:** details of sites within an organisation
- **Assets:** maintains an inventory of individual hardware items
- **Reporting:** Comprehensive built-in reporting capability

Benefits

- eliminate the need for multiple spreadsheets
- data stored in one location
- better data quality
- less data entry
- process automation
- increased staff productivity
- better data analysis
- improved decision making
- reduced costs with more efficient asset management

To arrange a demonstration of **ICT Portfolio Management System** contact us by email at info@dynamicsolutions.com.au or by mobile on **0408 293 340**.

Modules

Documentation

- Knowledge base for documents such as policies, procedures and training manuals
-

Master Items

Software

- Manufacturer
- Software name
- Asset category / Asset class / Asset type

Software Versions

- Version
- Edition
- Accreditations / Certifications
- Caveats
- Lifecycle management

Hardware

- Manufacturer
- Hardware name
- Asset category / Asset class / Asset type

Hardware Models

- Model
 - Model number
 - Components / Specifications
 - Accreditations / Certifications
 - Caveats
 - Lifecycle management
-

Environments

- Environment name
 - Environment category / Environment type
 - Environment owner
 - Status
 - Accreditations / Certifications Auditor
 - Caveats
 - Lifecycle management
 - Sites / Locations
 - Assets
-

Sites

- Site name
 - Asset category / Asset class / Asset type
 - Facilities / Buildings
 - Environments
-

Assets

- Hardware Model
 - Asset category / Asset class / Asset type
 - Serial number
 - Vendor
 - Installed software
 - Lifecycle management : Purchase / Warranty / Maintenance / Disposal
 - Business impact level
 - Environment / Site / Deployment location (Facility / Building)
-

Reporting

- Comprehensive built-in reporting capability
